

Microsoft Word 2010/2007

Level 2

Course Overview

In this 2-day course, you will learn intermediate to advanced techniques for creating and formatting documents in Microsoft Word. First, you will review Font and Paragraph formatting. You will then use advanced editing techniques to improve productivity. You will also learn to create styles to store collections of formats. You will learn how to create and modify tables. Additionally, you will learn to format sections of a document to have different footers, columns, and watermarks. Also, you will learn to merge documents to create form letters and labels. You will work with templates to speed your use of standard documents. You will also add graphics to a document. You will learn how to collaborate with others by adding comments, tracking changes, comparing two versions of a document, and reviewing tracked changes. You will also learn to create and customize a form. Additionally, you will learn how to secure a document. You will learn to manage long documents by creating a master document, adding an index, generating a table of contents, and adding a table of figures. You will also learn how to insert bookmarks, footnotes, captions, hyperlinks, and cross-references. Finally, you will learn how to use Word together with Excel. Prerequisite Course: Word Level 1 or equivalent experience.

Word Course Series:

Course Topics

Editing Techniques

- Handling Paragraphs
- Using Keyboard Navigation Keys
